

Appl. No.: 09/725,713
Response/Amendment dated January 11, 2006
Response to Final Office Action dated October 11, 2005

BEST AVAILABLE COPY

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. (Currently Amended) A multimedia content delivery system, comprising:
 - a content provider providing multimedia files;
 - a first integrated circuit card interface for receipt of a host integrated circuit card containing first authorization information;
 - a second integrated circuit card interface for receipt of a user integrated circuit card containing second authorization information;
 - an input device for selecting at least one multimedia file from the plurality of multimedia files;
 - an output device for providing the content of at least one authorized multimedia file provided by the content provider to a user of the user integrated circuit card; and
 - a control unit, responsive to the host and user integrated circuit cards being received in the first and second integrated circuit card interfaces, which compares the first and second authorization information and when the first and second authorization information is found to be compatible actuates said output device to provide the content of the at least one multimedia file from the content provider selected by said input device under control of the authorization information which authorizes downloading of the at least one authorized multimedia file through the output device, contained in the first and second authorization information; and wherein the content is not provided from the integrated circuit cards.

Appln. No.: 09/725,713
Response/Amendment dated January 11, 2006
Response to Final Office Action dated October 11, 2005

BEST AVAILABLE COPY

2. (Original) A multimedia content delivery system, as claim in claim 1, further comprising a multimedia terminal having said content provider, said first integrated circuit card in interface, and said control unit therein enclosed therein.
3. (Original) A multimedia content delivery system, as claimed in claim 1, wherein said output device comprises an audio output device.
4. (Original) A multimedia content delivery system, as claim in claim 1, wherein said output device comprises a video output device.
5. (Original) A multimedia content delivery system, as claim in claim 1, wherein said output device comprises a communication link permitting downloading of the selected multimedia file in electronic form.
6. (Original) A multimedia content delivery system, as claimed in claim 5, wherein said communication link is a wireless communication link.
7. (Original) A multimedia content delivery system, as claimed in claim 1, wherein said content provider, said input device, said output device, and said control unit comprise a laptop computer.

Appln. No.: 09/725,713
Response/Amendment dated January 11, 2006
Response to Final Office Action dated October 11, 2005

BEST AVAILABLE COPY

8. (Original) A multimedia content delivery system, as claims in claim 1, wherein said content provider, said input device, said output device, and said control unit comprise a wireless personal terminal.
9. (Original) A multimedia content delivery system, as claimed in claim 1, wherein said content provider comprises a server.
10. (Original) A multimedia content delivery system, as claims in claim 1, wherein said content provider further comprises a mainframe computer coupled to said server.
11. (Original) A multimedia content delivery system, as claimed in claim 1, further comprising a server connected to said content provider.
12. (Original) A multimedia content delivery system, as claimed in claim 1, further comprising a mainframe computer connected to said server.
13. (Original) A multimedia content delivery system, as claimed in claim 1, wherein said multimedia files comprise audio media.
14. (Original) A multimedia content delivery system, as claimed in claim 1, wherein said multimedia files comprise video media.

Appln. No.: 09/725,713
Response/Amendment dated January 11, 2006
Response to Final Office Action dated October 11, 2005

BEST AVAILABLE COPY

15. (Original) A multimedia content delivery system, as claimed in claim 14, wherein said video media comprises text.
16. (Original) A multimedia content delivery system, as claimed in claim 15, wherein said text comprises electronic books.
17. (Original) A multimedia content delivery system, as claimed in claim 15, wherein said text comprises newspapers.
18. (Original) A multimedia content delivery system, as claimed in claim 14, wherein said video media comprises games.
19. (Previously Presented) A process for providing multimedia content from a content provider, comprising the steps of:
 - (a) storing a multimedia file, having the multimedia content, in a storage unit;
 - (b) providing a first integrated circuit card interface for receiving of a first integrated circuit card containing first authorization information and a second integrated circuit card interface for receiving of a second integrated circuit card containing second authorization information;
 - (c) associating first authorization information stored in the first integrated circuit card with at least one multimedia file provided by the content provider;

Appln. No.: 09/725,713
Response/Amendment dated January 11, 2006
Response to Final Office Action dated October 11, 2005

BEST AVAILABLE COPY

(d) receiving the first integrated circuit card and the second integrated circuit card in the integrated circuit card interfaces and comparing the first authorization information with the second authorization information to determine if the first and second authorization information is compatible; and

(e) in response to step (d) when the first and second authorization is determined to be compatible, providing the at least one multimedia file to an output device to provide the at least one multimedia file from the content provider under control of authorization information, contained in the first and second authorization information, which authorizes the download of the at least one multimedia file through the output device to a user of the second integrated circuit card; and wherein the content is not provided from the integrated circuit cards.

20. (Original) A process as claim in claim 19, wherein step (b) comprises receiving a host integrated circuit card containing the first authorization information.

21. (Original) A process as claimed in claim 19, wherein step (d) comprises providing the content of the multimedia file to an audio output device.

22. (Original) A process as claimed in claim 19, wherein step (d) comprises providing the content of the multimedia file to a video output device.

23. (Original) A process as claimed in claim 19, wherein step (d) comprises providing the content of the multimedia file in electronic form to an output link.

Appn. No.: 09/725,713
Response/Amendment dated January 11, 2006
Response to Final Office Action dated October 11, 2005

BEST AVAILABLE COPY

24-28 (Cancelled).

29. (Withdrawn) A method in distributing electronic content to a terminal device, comprising the steps of:

- (a) storing in a memory module tailoring information defining electronic content that is transferable to the terminal device, the memory module being separate from and releasably attachable to the terminal device,
- (b) attaching the memory module to the terminal device,
- (c) reading the tailoring information from the memory module into the terminal device, and
- (d) transferring to the terminal device electronic content selected according to the tailoring information read from the memory module.

30. (Withdrawn) A method according to claim 29, wherein:

the method further comprises before step (d) the additional step of transmitting the tailoring information from the terminal device to a second device over a radio frequency link; and

step (d) comprises transferring the electronic content to the terminal device over the radio frequency link.

Appln. No.: 09/725,713
Response/Amendment dated January 11, 2006
Response to Final Office Action dated October 11, 2005

31. (Withdrawn) A method according to claim 30, wherein the radio frequency link is a short range of communication radio frequency link, and the second device is an access point of a short range communication system.

32. (Withdrawn) A method according to claim 31, wherein:

the method further comprises bringing the terminal device into the coverage area of the access point, sending an inquiry from the access point to the terminal device, sending from the terminal device a response to the inquiry, and transmitting the tailoring information to the access point, and

step (d) comprises transferring the electronic content from the access point to the terminal device according to the tailoring information.

33. (Withdrawn) A method as claimed in claim 31, wherein the method further comprises automatically transferring new electronic content from the access point to the terminal device, the new electronic content fulfilling the tailoring information requirements and being determined to not having been previously transferred to the terminal device.

34. (Withdrawn) A method as claimed in claim 31, further comprising before step (d) the further step of transmitting a prepaid amount of money electronically from the terminal device to the access point.

35. (Withdrawn) A method as claimed in claim 34, comprising:

Appn. No.: 09/725,713
Response/Amendment dated January 11, 2006
Response to Final Office Action dated October 11, 2005

BEST AVAILABLE COPY

storing a money balance electronically in the memory module, and
deducting the electronically transmitted amount of money from the money balance in the
memory module before the step of transmitting the prepaid amount of money from the terminal
device to the access point.

36. (Withdrawn) A method as claimed in claim 31, wherein:

the method comprises incorporating a first transceiver in the access point for
communicating in a first communication path with the terminal device over the short range radio
frequency link, and incorporating a second transceiver in the access point for communication in a
second communication path with the terminal device over the short range radio frequency link,

step (a) includes using the first transceiver to receive the tailoring information from the
terminal device, and transferring the tailoring information received by the first transceiver to the
second transceiver, and

step (d) comprises transferring the electronic content to the terminal device using the
second transceiver.

37. (Withdrawn) A method as claimed in claim 29, wherein the tailoring information
includes time dependent subscription period information defining a time period within which
electronic content may be transferred to the terminal device.

38. (Withdrawn) A method as claimed in claim 37, wherein the electronic content includes
copies of a periodically published item.

Appl. No.: 09/725,713
Response/Amendment dated January 11, 2006
Response to Final Office Action dated October 11, 2005

BEST AVAILABLE COPY

39. (Withdrawn) A method as claimed in claim 29, wherein the memory module comprises an integrated circuit card.

40. (Withdrawn) A method as claimed in claim 39, wherein step (d) comprises:
transferring the serial number of the IC card to an access point,
checking the validity of the IC card based on the serial number, and in response to a determination that the IC card is valid, transferring the electronic content to the terminal device.

41. (Withdrawn) A method as claimed in claim 29, wherein the electronic content comprises electronic goods and services.

42. (Withdrawn) A method as claimed in claim 41, wherein the electronic content is at least one content selected from the group consisting of movies, music, games, electronic magazines, periodicals, newspapers, and tv-news.

43. (Withdrawn) A method as claimed in claim 41, wherein the electronic content includes a series of movies.

44. (Withdrawn) A system for distributing electronic content, comprising:
a network connection usable as a transfer medium for transferring electronic content,

Appln. No.: 09/725,713
Response/Amendment dated January 11, 2006
Response to Final Office Action dated October 11, 2005

BEST AVAILABLE COPY

a network element for transferring selected electronic content over the network connection according to predetermined tailoring information, the tailoring information defining the selected electronic content to be transferred from the network element,

a terminal device for receiving electronic content over the network connection,

a memory module for storing the tailoring information, the memory module being separate from the releasably attachable to the terminal device, and

attaching means for attaching the memory module to the terminal device, wherein:

the terminal device includes means to read the tailoring information from the memory module and to transmit the tailoring information to the network element over the network connection, and

the network element is adapted to transfer electronic content to the terminal device over the network connection according to the tailoring information.

45. (Withdrawn) A memory module for storing information and for use with a terminal device, the memory module comprising:

a storage medium for storing tailoring information relating to specific electronic content that the memory module authorizes to be transferable to the terminal device, and

an interface for mechanically and electrically coupling the memory module to the terminal device, the memory module being releasably attachable by the interface to the terminal device to bring the memory module into mechanical and electrical contact with the terminal device.

Appn. No.: 09/725,713
Response/Amendment dated January 11, 2006
Response to Final Office Action dated October 11, 2005

BEST AVAILABLE COPY

46. (Withdrawn) A memory module as claimed in claim 45, wherein the memory module is an IC card.

47. (Withdrawn) A memory module as claimed in claim 45, wherein the memory module comprises a storage medium for electronically storing a monetary amount to be used as payment for the specific electronic content.

48. (Withdrawn) A terminal device comprising:
a storage device for storing tailoring information relating to specific electronic content,
an interface for mechanically and electrically coupling the storage device to the terminal device, the interface allowing releasable attachment of the storage device to the terminal device to bring the storage device into mechanical and electrical contact with the terminal device,
means for reading and tailoring information from the storage device into the terminal device when the storage device is mechanically and electrically connected to the terminal device by the interface, the tailoring information defining specific electronic content that the storage device authorizes as being transferable to the terminal device, and
means for transmitting the tailoring information by wireless communication in order to receive electronic content at the terminal device according to the tailoring information

49. (Withdrawn) A multimedia content delivery system in accordance with claim 1, wherein the authorization information indicates a specific multimedia file from the content provider which may be provided by the output device.

Appn. No.: 09/725,713
Response/Amendment dated January 11, 2006
Response to Final Office Action dated October 11, 2005

BEST AVAILABLE COPY

50. (Withdrawn) A multimedia content delivery system in accordance with claim , wherein:
the authorization information indicates a group of multimedia files from the content provider which may be provided by the output device.

51. (Withdrawn) A multimedia content delivery system in accordance with claim , wherein:
the authorization information indicates a category of multimedia files from the content provider which may be provided by the output device.

52. (Withdrawn) A multimedia content delivery system in accordance with claim wherein:
the authorization information indicates a maximum of multimedia files which may be provided by the output device.

53. (Withdrawn) A multimedia content delivery system in accordance with claim wherein:
the authorization information indicates a maximum monetary value of multimedia files that user is authorized to download.

54. (Withdrawn) A process in accordance with claim 19 wherein:
the authorization information indicates a specific multimedia file from the content provider which may be provided by the output device.

55. (Withdrawn) A process in accordance with claim 19 wherein:

Appln. No.: 09/725,713
Response/Amendment dated January 11, 2006
Response to Final Office Action dated October 11, 2005

BEST AVAILABLE COPY

the authorization information indicates a group of multimedia files from the content provider which may be provided by the output device.

56. (Withdrawn) A process in accordance with claim 19 wherein:

the authorization information indicates a category of multimedia files from the content provider which may be provided by the output device.

57. (Withdrawn) A process in accordance with claim 19 wherein:

the authorization information indicates a maximum number of multimedia files which may be provided by the output device.

58. (Withdrawn) A process in accordance with claim 19 wherein:

the authorization information indicates a maximum monetary value of multimedia files that user is authorized to download.
